

FIELD REPAIR KIT

Ideal for emergency repairs of expanded beam assemblies

v4.1, 2025-05-13

A complete and durable repair kit designed for fast and reliable fiber optic repairs in the field. Engineered to withstand harsh conditions without compromising on quality or ease of use. Ideal for emergency repairs, the kit includes Corning CamSplice™ mechanical splices, recommended for both indoor and outdoor applications.

The kit can be customized with FALCON or PROCON expanded beam connectors with 2 or 4 channels. It can also be customized to meet your specific operational requirements, ensuring optimal performance for any emergency repair work.

Features

- Easy handling
- Quick and reliable
- No adhesive or epoxy required
- Designed for difficult installation scenarios
- Custom foam interior
