### **REACH and RoHS Certificate of Compliance**

Micropol Fiberoptic fully supports the aim of Reach in improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. As a downstream user, the products of Micropol are non-chemical products that are not designed to release any substance under normal and reasonably predictable application scenarios during their lifespan.

We are striving towards that our products do not contain more than 0.1% by weight of the Substances of the Very High Concern (SVHC) as listed by the European Chemical Agency (ECHA) under the provisions of Regulation No. 1907/2006 including the new candidate list that was released on 17<sup>th</sup> of January 2023. Due to regular updates of the candidate list this is an ongoing activity in our supply chain.

The main part of the products supplied by Micropol Fiberoptic is passive, non-powered products. A few products are aimed to be powdered; these products are covered by the RoHS-legislation. For these specific products Micropol Fiberoptic hereby declare that our products comply with the European Directive for the restriction of use of hazardous substances in electrical and electronic equipment (RoHS) including Directive 2015/863 published in 2015 amending Annex II of Directive 2011/65/EU. We certify that our products do not contain any of the banned substances, in quantities which would exceed those specified limits.

It is the intention of Micropol Fiberoptic to deal only with suppliers that can demonstrate that they can manufacture their components or materials in a health & safety and environmentally responsible manner.

Peter Ljungkvist  
CEO, AB Micropol Fiberoptic
