Lightframe Modular is a stackable ODF that is just 44 mm high (1U). Lack of space continues to be a challenge when fibernets expand. Lightframe Modular is a surface efficient solution which creates more space in nodes and data centers.

Lightframe Modular is designed to save time on site. The back piece on the box is pre-assembled. If you need to remove it, you easily snap it off. The cable is fixed by the next unit or by the lid.

The ODF is designed with a protective frame to facilitate fixing of the fibers and for marking.

Lightframe Modular is delivered with tailor made welding sleeve holders, which makes it easy to weld. The welding sleeve is placed where the installer finds it suitable to minimize strain on the fiber. This means that you do not need a splice tray in the box.

By delivering the Lightframe modular in four different variants and with the customized numbering on the front (vertical or horizontal marking), Lightframe Modular is prepared for the future's fibre nets.

FEATURES

- Modular and only 44mm high
- The welding sleeve holder is placed where the installer finds it suitable to minimize strain on the fiber.
- The cable cover is fixed by the next unit or by the lid
- The ODF is equipped with a protective frame to facilitate fixing of the fibers and for marking
- Customized print on the front (vertical or horizontal)

Lightframe modular is available in the following variants :

1. ODF
2. ODF with adapters
3. Pre-assembled ODF with pigtails
4. Pre fabricated ODF

Contact us for more information about our Lightframe Modular variants.
