## OPTICAL TESTS IN HARSH ENVIRONMENTS

The ruggedized optical test set is designed for testing of optical networks terminated with connectors operating in harsh environment. It combines both light source and optical power meter in one common box. The test set is designed to meet the tactical military, and broadcast industry demands.

The ruggedized case makes the unit ideal for field operation. The rechargeable battery ensures long term working with minimal operation costs.

## FEATURES AND BENEFITS

- Expanded Beam harsh environmental connectors
- Simultaneous testing up to 12 fibers
- High dynamic range
- Easy to use with menu navigation

Operational capacity | 7 hours active use, 10 hours standby

Battery | Rechargeable, 3 hours charging time  
Battery status indicator  
Charging power supply 12VDC max 1A

Dynamic range | 0 to -60dBm

Display units | dBm, dB

Content | Ruggedized case  
Falcon loop connectors

Weight  
Measurement tool | 772,8g
