The FALCON connectors offer the best attenuation values and smallest 12-channel connector foot print on the market. With insertion loss of <1,2 dB it outperforms the NATO specification (<2,5 dB) have the best optical performance on the market.

This is achieved with Micropol's lens technology, state of the art production and alignment process.

The FALCON expanded beam connector JR Plug Low-Profile is the only junior sized connector in the world with a range from 1- 12 fibers, that have approved beam size according to MIL-M83526/20&21.

The Low-Profile allows it to be used even in the most cramped environments and installations.

Like the other connectors in the FALCON family, it is compatible with other Junior-size expanded beam connectors on the market.
