Part number: RF-FA1

Description: The CleanWipes™ Singles Outdoor Fiber Optic Wipes are hermetically-sealed, super-strong, lint free fiber optic wipes engineered for cleaning fiber end-faces in harsh environments. Each wipe will provide fast, consistent and convenient end-face cleaning even in the most difficult conditions (wind, rain, snow, dust storms, etc.). Each wipe is protected in an envelope that keeps it clean and dry until opened. CleanWipes™ Singles are paper! They are made from a field-proven, lint-free polyester fabric that resists shredding and tearing, even on LC end-faces. The wipes contain no cellulose which might contaminate surfaces and no glues that might scratch end-faces. Each wipe can clean up to six connector end-faces.

Quantity 50 pcs

Key features of the Outdoor CleanWipes™ Singles include:

- High-purity, lint-free dry wipe
- Stays clean and dry until the package is opened
- Designed for use in harsh environments
- Fits in tool kits and pockets
- Technician-friendly
